

IMI PBM

INDUSTRIAL VALVES

Adjust-O-Seal® Feature

- IMI PBM valves with adjustable sealing provide bidirectional upstream sealing.
- Valve body bolts can be tightened to compensate for normal seat wear without having to remove the valve from service.

Competitor's Design

Line pressure pushes ball downstream in the ball-closed position, providing sealing at the downstream seat. There is no adjustment to compensate for seat wear.

IMI PBM's Design

Valve body bolts compress valve seats against the ball, providing bidirectional sealing at the upstream seat. To compensate for seat wear, body bolts can be slightly tightened to recompress seats against ball.

IMI PBM valves offer value over the life of the product with:

- Fewer process interruptions
- Longer life
- Clean/drain without process interruption
- Improved product yields

IMI PBM also offers:

- On-time delivery
- Documentation
- Solutions to tough applications

This means on valves mounted vertically like IMI PBM's angle stem flush tank valve, the valve seats on the upstream seat, thus allowing the body to be purged and drained without process interruption.

Materials

Stainless Steel

316 S/S complies with ASTM A 351-CF8M or A479, S31600

316L S/S complies with ASTM A 351-CF3M or A479, S31603

- Is exceptionally corrosion-resistant to acidic and basic environments and does not pit easily.
- Can be polished to a near-mirror finish for easy cleanability.
- Weld fittings have a carbon content of < 0.3% to facilitate welding.

Carbon Steel, A216-WCB

- This versatile material handles mildly corrosive media.

Bronze, Alloy 922

- Excellent resistance to sea water environments and good steam resistance. Also suitable for sub-zero temperature applications.

Hastelloy® C-276

- Very good in corrosion reducing and mildly oxidizing environments. Very good resistance to localized attack and stress corrosion cracking. Alloy CW-12MW in cast form.

Others

- Additional materials are available, including Alloy 20, Bronze, Duplex Stainless Steels, Hastelloys, Titanium, and Inconel®.

Seat and Seal Materials

Designation	Description	Color	Purpose
V-TEF™	Chemically Modified PTFE IMI PBM Standard for Series 4, 5 6, & 7	White	Suitable for applications under 400°F. This chemically modified PTFE material is IMI PBM's standard seat and seal material. It combines the ruggedness of a filled PTFE with the low coefficient of friction of virgin PTFE. V-TEF™ also has much improved porosity control and deformation under load when compared to PTFE grades. FDA and USP Class VI compliant. Meets bubbletight seat leakage.
RTFE	Glass Reinforced PTFE	Slightly Off White	Suitable for applications under 400°F. Used in a variety of applications. Bubbletight leakage.
VTFE	Virgin PTFE	White	Suitable for applications under 350°F. A low stem torque material ideal for sanitary use. FDA and USP Class VI compliant. Meets bubbletight seat leakage.
S-TEF®	Stainless Steel Reinforced PTFE	Charcoal Gray	Suitable for applications under 450°F. A suitable material for higher pressure/temperature applications. Higher stem torque than virgin grades and V-TEF™. USP Class VI compliant. Meets bubbletight seat leakage.
CARBON	Carbon/Graphite	Black	Suitable for applications under 750°F (400°C). A hard material impervious to high temperatures. It is used for heat transfer fluid applications and other high temperature applications. Meets Class V seat leakage.
UHMWPE	Ultra High Molecular Weight Polyethylene	Off White	Suitable for applications under 200°F. An extremely wear resistant material having a wear rate about 1/10th that of PTFE. FDA compliant and is used in high cycle applications where possible. Meets bubbletight seat leakage.
PEEK®	Poly ether ether ketone	Putty	Suitable for applications under 500°F. PEEK® is a rugged, high strength material having fairly high stem torque. IMI PBM's PEEK® is 10 weight percent PTFE to reduce the hardness of virgin PEEK®. FDA compliant and meets Class V seat leakage.
KYNAR®	Polyvinylidene Fluoride	Slightly Transparent White	Suitable for applications under 250°F. Kynar® has been used successfully in abrasive service and is suitable for radiation environments where gamma levels accumulate to 1,000 megarads. FDA and USP Class VI compliant. Meets bubbletight seat leakage.

NOTES:

1. PTFE is Polytetrafluorethylene.

2. Seat and seal materials may be mixed in a valve in order to provide media-compatibility and the appropriate torque, temperature and pressure ratings.

3. Temperature ratings above based on 0 psi. See Pressure & Temperature charts on page 8.

- Notes:
1. For valves with UHMWPE and RTFE seats, multiply the above values by 1.25
 2. For valves which have S-TEF® or Kynar® seats multiply the above values by 1.56.
 3. For valves with PEEK® seats multiply the above values by 1.7.
 4. Where trunnion is indicated, IMI PBM recommends trunnion mounting the ball to avoid excessive seat loads and stem torques.
 5. For AF Series 1 and 3 stem torques, refer to IMI PBM Sanitary Brochure, LT-34.
 6. CP torque valves assume service at -320°F.
 7. For Series 5 SD, FD, DD valves ins steam service and having RTFE seats, multiply minimum V-TEF/VTFE actuator torques by 1.56.

Metal Seats

IMI PBM's Metal Seated Valve Applications include:

- STEAM SERVICE
- HIGH TEMPERATURE / PRESSURE
- ABRASION RESISTANCE
- MODULATING SERVICE

Design Features:

- 1/2" - 4" in Full Bore, CL150 and CL300 standard
- Design capability to manufacture larger sizes and higher pressure classes
- Temps up to 800°F/427°C
- Class V shut-off
- Live-loaded packing assures long maintenance-free operation
- IMI PBM's metal seated valves are fundamentally firesafe
- Valves with weld end fittings can be welded without disassembly.
- Optional patented locking lever handle and complete line of automation and controls
- Complete repair services available - fast turn around on valve repair
- Short lead times on stocked ANSI valves sizes 1/2" through 2"
- SIL-3 capable per IEC 61508
- Extended handles and automation brackets available for higher temperature services.

Specially designed carbide and/or ceramic thermal spray coatings are a valve industry standard. All of the coatings are applied robotically, using the Accuraspray Plume Sensor System, to insure consistently high quality coatings.

CHROME CARBIDE	
TYPICAL COMPOSITION, WT%	
Nickel Chrome	20%
Chrome Carbide	Balance
COATING CHARACTERISTICS	
Bond Strength, PSI	>10,000/690 bar
Hardness	67
Porosity	2%
Max. Service Temperature	800°F/427°C

TUNGSTEN CARBIDE	
TYPICAL COMPOSITION, WT%	
Carbon	3.7%
Iron	0.5%
Nickel	10.0%
Tungsten Carbide	Balance
COATING CHARACTERISTICS	
Bond Strength, PSI	>10,000/690 bar
Hardness	65-58 RC
Porosity	<1%
Max. Service Temperature	800°F/427°C

Coating Options:

Chrome Carbide, 20% Nickel/Chrome

A hard coating that does not oxidize at high temperatures. Provides good abrasion, particle erosion cavitation and fretting resistance in high temperature environments. Good corrosion resistance and sliding properties.

Tungsten Carbide, 10% Nickel

A hard, dense coating to resist high abrasive conditions, as well as particle erosion and fretting while providing the corrosion resistance of nickel with minimal loss of heat resistance.

Coating Testing:

- Bond Strength Tensile Test
- Shear Strength Tensile Test
- Macro Hardness Rockwell Test
- Porosity Determination
- Bond Line Contamination
- Abrasion Wear Testing

Written Specifications

SP, SD SERIES 5

Two-Way, Full Port Ball Valve; Body, ball, stem, and end fitting material shall be 316/316L Stainless Steel, HASTELLOY® C-276, Carbon Steel, Bronze Alloy 922, or other. Valve shall be three-piece "swing-out" body design. Seats and seals shall be V-TEF™ - PTFE material and provide both upstream and downstream bubbletight seal and be adjustable for in-line wear. (For SD Series 5 Only - Seats shall be V-TEF™ - PTFE material with EPR O-ring energizer. Seats shall have 316/316L Stainless Steel encapsulation on ID, provide both upstream and downstream bubbletight seal, and be adjustable for in-line wear. Body seal shall be EPR O-rings with V-TEF™ - PTFE back up seal. Body bolts shall be live loaded with Belleville washers.) Stem packing shall be live loaded V-TEF™ - PTFE. For manual valves, handle shall be 300 series stainless steel with optional lever locking device. Body bolts, nuts, and Belleville washers shall be 18-8 stainless steel. Maximum working pressure to be 900 psig but is limited based on valve size, valve material, and end fitting type. Valves are full vacuum. Valves shall not require disassembly for butt welding. Valves shall be non-firesafe design unless otherwise specified. For fire rated valves to API 607 Edition 4, sizes 1/2" - 3", designate Series 6 (see section "FIRE RATED"). IMI PBM Model Number "SP" or "SD"(Material)(Size)5(End Connection)(Seat & Seal, Cavity Filler, O-Ring Material)

SD Series 5: Two-Way Full Port Steam Ball Valve; Body, ball, stem, and end fitting material shall be 316 stainless steel, HASTELLOY® C-276, Carbon Steel, HASTELLOY® C-22®, bronze alloy 922, or other. Valve shall be three-piece "swing-out" body. Seats shall be V-TEF™ - PTFE with EPR O-ring energizer. Seats shall have stainless steel encapsulation on ID, provide both upstream and downstream bubbletight seal and be adjustable for in-line wear. Stem packing shall be live loaded white V-TEF™-PTFE. Body seal shall be EPR o-rings with white V-TEF™-PTFE back up seal. Optional 300 Series s/s 2" stem extension for 4" thick installation. Valves shall not require disassembly for butt welding. Body bolts, nuts, and Belleville washers shall be 18-8 stainless steel. Body bolts shall be live-loaded with Belleville washers. Maximum working pressure to be 720 PSIG and full vacuum but is limited based on valve size, valve material, and end fitting type. Valves shall be a non-firesafe design. To add automation and controls, see section "Automation and Controls". IMI PBM Model number SD (material)-(size) 5 (end connection)

FT, FD SERIES 5

Flush Tank Bottom Ball Valve; Body, ball, stem, and end fitting material shall be 316/316L Stainless Steel, Hastelloy® C-276, Carbon Steel, Bronze Alloy 922, or other. Weld Pad shall be 316L Stainless Steel or other material (Specify). Valve shall be three-piece "swing-out" body design. Seats and seals shall be V-TEF™ - PTFE material and provide both upstream and downstream bubbletight seal and be adjustable for in-line wear. (For FD Series 5 Only - Seats shall be V-TEF™ - PTFE material with EPR O-ring energizer. Seats shall have 316/316L Stainless Steel encapsulation on ID, provide both upstream and downstream bubbletight seal, and be adjustable for in-line wear. Body seal shall be EPR O-rings with V-TEF™ - PTFE back up seal. Body bolts shall be live loaded with Belleville washers.) Stem packing shall be live loaded V-TEF™ - PTFE. For manual valves, handle shall be 300 series stainless steel with optional lever locking device. Body bolts, nuts, and Belleville washers shall be 18-8 stainless steel. Valves shall be non-firesafe design unless otherwise specified. For fire rated valves to API 607 Edition 4, sizes 1/2" - 3", designate Series 6 (see section "FIRE RATED").

To add automation and controls, see section "AUTOMATION AND CONTROLS".

IMI PBM Model Number "FT" or "FD"(Material)(Size)5(End Connection)(Seat & Seal, Cavity Filler, O-Ring Material)

AF SERIES 1

Angle Stem Flush Tank Bottom Ball Valve; Body, ball, stem, and end fitting material shall be 316/316L Stainless Steel, Hastelloy® C-276, Carbon Steel, Bronze Alloy 922, or other. Weld Pad shall be 316L Stainless Steel or other material (Specify). Valve shall be two-piece design. Seats and seals shall be RTFE material and provide both upstream and downstream bubbletight seal and be adjustable for in-line wear. Stem packing shall be live loaded RTFE. For manual valves, handle shall be 300 series stainless steel with optional lever locking device. Body bolts and nuts shall be 18-8 stainless steel. Valves shall be non-firesafe design unless otherwise specified. For fire rated valves to API 607 Edition 4, sizes 1" - 6", designate Series 3 (see section "FIRE RATED"). To add automation and controls, see section "AUTOMATION AND CONTROLS".

IMI PBM Model Number AF(Material)(Size)1(End Connection)(Seat & Seal, Cavity Filler, O-Ring Material)

CP SERIES 6, 2-Way Firesafe CRYOGENIC Valve

Uni-directional Flow and Vented Ball; Material shall be 316/316L Stainless Steel or other material (Specify). Seats and seals shall be V-TEF™, seat and stem packings shall be live-loaded. Valve shall be uni-directional with body markings for flow direction and upstream vent hole in ball. End connections available include female NPT, 150# ANSI RF flanged, extended butt weld for Sch 40 pipe and extended socket weld ends. Extended ends do not require valve to be disassembled for welding. For manual valves, handle shall be 300 series stainless steel. Maximum working pressure to be 720 psig CWP and temperatures from ambient to -320 degrees F (-200 degrees C). Valve shall be cleaned for oxygen service and shall meet or exceed leakage performance per MSS SP-134.

Optional automation (Pneumatic or electric), mechanical and electro-polishing surfaces, sizes 1/2-inch through 4-inch

IMI PBM Model Number CP(Material)(Size)(Series)(End Connection)(Seat & Seal, Cavity Filler, O-Ring Material)

DP, DD SERIES 5

Three-Way, Diverter Port Ball Valve; Body, ball, stem, and end fitting material shall be 316/316L Stainless Steel, Hastelloy® C-276, or other. Valve shall be three-piece design. Seats and seals shall be V-TEF™ - PTFE material and provide both upstream and downstream bubbletight seal and be adjustable for in-line wear. (For DD Series 5 Only - Seats shall be V-TEF™ - PTFE material with EPR O-ring energizer. Seats shall have 316/316L Stainless Steel encapsulation on ID, provide both upstream and downstream bubbletight seal, and be adjustable for in-line wear. Body seal shall be EPR O-rings with V-TEF™ - PTFE back up seal. Body bolts shall be live loaded with Belleville washers.) Stem packing shall be live loaded V-TEF™ - PTFE. For manual valves, handle shall be 300 series stainless steel with

optional lever locking device. Body bolts, nuts, and Belleville washers shall be 18-8 stainless steel. Maximum working pressure to be 900 psig but is limited based on valve size, valve material, and end fitting type. Valves are full vacuum. Specify IMI PBM Flow Pattern. To add automation and controls, see section "AUTOMATION AND CONTROLS".

IMI PBM Model Number "DP" or "DD"(Material)(Size)5(End Connection)(Seat & Seal, Cavity Filler, O-Ring Material)(IMI PBM Flow Pattern)

AN SERIES 1

Two-Way, ANSI Flanged Full Port Ball Valve; Body, ball, stem, and end fitting material shall be 316/316L Stainless Steel, Hastelloy® C-276, Carbon Steel, Bronze, Aluminum Bronze, or other. Valve shall be two-piece "split body" design. Seats and seals shall be RTFE material with Viton® or EPR O-Ring body seal. Seats shall provide both upstream and downstream bubbletight seal and be adjustable for in-line wear. Stem packing shall be live loaded RTFE. End fittings shall be ANSI 150# flanged per ANSI B16.5 and face to face dimension shall conform to ASME B16.10 Long Pattern. For manual valves, handle shall be 300 series stainless steel with optional lever locking device. Body bolts and nuts shall be 18-8 stainless steel. Maximum working pressure to be 285 psig but is limited based on valve size, valve material, and end fitting type. Valves are full vacuum. Valves shall be 100% tested per ASME / ANSI B16.34. Valves shall be non-firesafe design unless otherwise specified. For fire rated valves to API 607 Edition 4, sizes 1/2" - 6", designate Series 3 or Series 6 (see section "FIRE RATED"). To add automation and controls, see section "AUTOMATION AND CONTROLS".

IMI PBM Model Number AN(Material)(Size)1(End Connection)(Seat & Seal, Cavity Filler, O-Ring Material)

AN SERIES 5

Two-Way, ANSI Flanged Full Port Ball Valve; Body, ball, stem, and end fitting material shall be 316/316L Stainless Steel or Carbon Steel. Valve shall be two-piece "split body" design. Seats and seals shall be V-TEF™ - PTFE material with Viton® or EPR O-Ring body seal. Seats shall provide both upstream and downstream bubbletight seal and be adjustable for in-line wear. Stem packing shall be live loaded V-TEF™ - PTFE. End fittings shall be ANSI 150# flanged per ANSI B16.5 and face to face dimension shall conform to ASME B16.10 Long Pattern. For manual valves, handle shall be 300 series stainless steel with optional lever locking device. Body bolts and nuts shall be 18-8 stainless steel. Maximum working pressure to be 740 psig but is limited based on valve size, valve material, and end fitting type. Valves are full vacuum. Valves shall be 100% tested per ASME / ANSI B16.34. Valves shall be non-firesafe design unless otherwise specified. For fire rated valves to API 607 Edition 4, sizes 1/2" - 4", designate Series 6 (see section "FIRE RATED").

To add automation and controls, see section "AUTOMATION AND CONTROLS".

IMI PBM Model Number AN(Material)(Size)5(End Connection)(Seat & Seal, Cavity Filler, O-Ring Material)

MP SERIES 1, 4 AND 5

Three, Four, or Five Way Multi-port Ball Valve; Body, ball, stem, and end fitting material shall be 316/316L Stainless Steel, Carbon Steel, Hastelloy® C-276, or other (Series 1 only - Ductile Iron and Bronze). Valve shall have 4 or 5 V-TEF™ - PTFE (Series 1 only - RTFE) seats and seals and provide bubbletight seal and be adjustable for in-line wear. Stem packing shall be live loaded V-TEF™ - PTFE (Series 1 only - RTFE). For manual valves, handle shall be 300 series stainless steel (Series 4 or 5 - optional lever locking device). Body bolts and nuts shall be 18-8 stainless steel. Maximum working pressure to be 720 psig (Series 1 only - 400 psig) but is limited based on valve size, valve material, and end fitting type. Valves are full vacuum. Specify IMI PBM Flow Pattern for 3, 4, or 5-way valve. To add automation and controls, see section "AUTOMATION AND CONTROLS".

IMI PBM Model Number MP(Material)(Size)(Series)(End Connection)(Seat & Seal, Cavity Filler, O-Ring Material)(IMI PBM Flow Pattern)

TI SERIES 5

Transmitter Isolation Ball Valve; Body, ball, stem, and end fitting material shall be 316/316L Stainless Steel, Hastelloy®, Titanium, or others with 1" or 2-1/2" port diameter. Tank side flange to accommodate both standard ANSI 3", 150# flange drilling and a 25 to 27 degree offset flange pattern. Instrument side flange shall be drilled to accommodate a standard ANSI 3", 150# flange drilling. Valve shall have a 1/4 turn manual 300 series stainless steel handle with lever locking device. Valve shall have four (4) 1/4" FNPT Purge Ports, each with a 1/4" MNPT plug made from the same material as the valve body. Seats and seals shall be V-TEF™ - PTFE material with VTFE O-ring.

IMI PBM Model Number TI(Material)(Size)5(End Connection)(Seat & Seal, Cavity Filler, O-Ring Material)

FIRE RATED (SERIES 3 AND SERIES 6)

Two-Way, Industrial Ball Valve; SP Series 6 and FT Series 6, 1/2" - 3", AN Series 6, 1/2" - 4", AN Series 3 and AF Series 3, 1" - 6". Valve design shall be tested and comply with criteria set forth in API-607 Edition 4. Valve body bolts to be fully encapsulated. Valve design is non-Adjust-O-Seal®. Body seals shall be graphite material isolated from product stream under normal operating conditions by O-ring seals. Upon sublimation of seat and seal material in the event of a fire condition, a metal back up seat shall seal the valve at leakage rates in accordance with API-607, Edition 4. Maximum working pressure to be 720 PSIG and full vacuum but is limited based on valve size, valve material, and end fitting type.

IMI PBM Model Number (Product)(Material)(Size)(Series)(End Connection)(Seat & Seal Material)

AUTOMATION AND CONTROLS

Direct Mount Automated Ball Valves; Valves as specified in "Manual Valves" section with the addition of a "Direct Mount" double acting or spring return pneumatic actuator. Actuator shall be of the double opposing piston, rack and pinion design with bidirectional pinion travel stops and hard anodized aluminum oxide body with co-deposited fluoropolymer. End caps to be polyester powder coated with 300 series stainless steel fasteners. Mounting bracket shall be stainless steel and valve stem shall insert directly into actuator drive adapter. Actuators shall be sized utilizing a 100% safety factor. Specify supply air pressure at actuator (60 or 80 PSIG). IMI PBM Model Number starts with "PA". Electric actuators, limit switches, positioners, solenoids, and field bus accessories; Specify according to all statutory and regulatory requirements. Include NEMA rating Requirements and electrical current.

Instrument Valves

IMI PBM's instrument valve is used for process isolation or isolation of pressure gauges, orifice plates, flush rings and various measurement instruments. Valves are designed to ASME B16.34. They offer a higher performance solution to needle valves.

SIZES

- 1/2" and 3/4" sizes with 0.41 bore

PRESSURE CLASS

- 1/4" - 3/4" Up To ANSI CL2500 (CL1500 standard)

MATERIALS

- Stainless Steel
- Duplex Stainless Steel
- Carbon Steels
- Monel®
- Hastelloys®
- Others Available

END CONNECTIONS

- Thread Pipe, male or female Flanged
- Buttweld (tube or pipe)
- Socket Weld (male or female)
- Compression
- Instrument Adapter Flange
- Others Available

FEATURES

- Quarter Turn Operation
- Optional Extended Handle with lock out
- Bleed or Gauge Ports Available
- Soft and Metal Seated Designs
- Locking Handle Standard
- Welded Body
- API-622 Low-E Stem Packing Standard
- Rodable in 1/4" - 3/4"
- SIL-3 Capable per IEC 61508

SEATING

- V-Tef™ Seats - 350°F, 176°C
- S-Tef® Seats - 400°F, 204°C
- PEEK® Seats - 500°F, 260°C
- Stellite® Ball & Seats, 800°F, 427°C
- Tungsten or Chrome Carbide Coated S/S Ball & Seats, < 800°F, 427°C

Notes:

IMI PBM can comply with API-6D if specified.

2-WAY VALVE End Fitting	A inches	A mm
Ext. Male NPT	6.50	165
Male NPT	4.75	121
Female NPT	4.00	102
Ext. Female Socket Weld	6.50	165
Buttweld for Sch. 40 Pipe	6.50	165
Buttweld for Tube	6.50	165

Notes:
Dimensions shown for 1/2" valves only.
Design is rodable with rod out tool.

PACKING

- Die molded Graphite (High Temperature) V-Tef™ or S-Tef®
- API-622 Low-E Stem Packing Standard in 1/2" and 3/4" sizes with .41 bore. It is optional in larger sizes.

TESTING AND DOCUMENTATION

- MTR (Material Test Reports)
- PMI (Positive Material Identification)
- LP (Liquid penetrant)
- Radiographic examination
- Pressure testing per API 598
- Magnetic particle examination
- Ultrasonic examination

IMI PBM's New Style Instrument Valves are Tested & Proven to the API 622 Standard

What makes IMI PBM valves API 622?

IMI PBM's Instrument (IM) new style valves standardize on a product offering with API 622 packing which certifies IMI PBM valves for low emission technology.

The API 622 packing features:

- Average stem packing leakage ≤ 10 ppmv for the duration of the test (100 ppm allowable)
- API-607 fire tested
- Successfully passed API-622 testing, test report available upon request.

Bolted Instrument Valves

IMI PBM's bolted Instrument Valve design allows end connection design and fabrication flexibility. It is available in a wide range of materials for a variety of temperature and pressure classes to meet your most stringent process applications.

FEATURES

- Full and Reduced Port Designs
- Customizable End Connections
- Quarter Turn Operation
- Bleed or Gauge Ports Available
- Bolted Body
- API-607 Fire Rated
- Braided Graphite Packing
- API-622 Low-E Stem Packing Standard
- Gear Operator recommended for 1-1/2" and above.

SIZES

- 1/2" - 2" CL600, CL900 and CL1500

SEATING

- V-TEF™ Seats: 350°F (176°C)
- S-TEF® Seats: 400°F (204°C)
- PEEK® Seats: 500°F (260°C)
- Stellite® Ball & Seats: 800°F (427°C)
- Tungsten or Chrome Carbide Coated S/S Ball & Seats: 800°F (427°C)

BOLTED INSTRUMENT VALVES PRESSURE/TEMPERATURE AND TORQUE CHARTS

— Transmitter Isolation Valves —

IMI PBM Transmitter Isolation Valves are valves used to isolate media in a tank from a pressure/level transmitter. The valve when in the open position creates a communication between the media in the tank and the transmitter. The valve is only closed when the transmitter needs to be isolated for service.

Full or True Bore® Port ANSI Style Transmitter Isolation Valves provide value to the customer.

Transmitter Isolation Valves CL300, CL600

**Pressure Classes: 150-600
Sizes: 1x2, 1x3, 2.5 x 3 Inch
(ball port size x flange size)
Any Materials, Temps <800°F
Purge/Cal Port Sizes: 1/4 or 1/2 inch
FNPT (2 or 4 ports available)
Make to Order. Custom
configurations available.**

Fabflex® Instrumentation Valve Manifolds

IMI PBM's Valve Manifolds have temperatures that range from 300° to 600° F, 149 to 316°C with pressures from 150 to 400 psig, 10 to 28 barg. A refinery uses these manifolds for measuring as well as level indication.

Fabflex® Fabricated Manifold Solution:

- Custom IMI PBM Fabflex® manifold design for multiple instrumentation mounts.
- Custom manifold design to optimize space utilization.
- Factory fabricated in a controlled manufacturing environment to ensure high quality welding fabrication process.
- Individual valves fabricated "into" the manifold eliminating many emission leak paths to improve the overall EPA rating of the system.
- Field installation simplified into bolting up one flange and installing the transmitters, transducers or other instrumentation.

Flush Rings/Bleed Rings with Integral Valve

Flush rings and Bleed rings to customer material and pressure class specifications designed to fit between standard flanges using conventional flange gaskets. Integral ball valve allows venting purging, sampling and instrument isolation.

Sizes:

- 2" width standard

Consult IMI PBM for additional sizes.

Materials:

- Stainless Steel
- Duplex
- Hastelloy®
- Others

Features:

- Integral code-welded valve for flushing purging and instrument isolation.

Sampling Tank Bottom Valves

Sample process media quickly and easily with IMI PBM's Sampling Valve. Special pad design minimizes dead space. Easy CIP with Purge Ports and Milled Ball Flats ensures reliable samples. Valve can be shipped pre-mounted to piping for easy installation. Ideal for heavy duty and sanitary applications. Manual valves standard.

Sizes:

- 1/2" - 2"

Materials:

- 316 & 316L S/S
- Hastelloy®
- Titanium
- Others

Options:

- Actuation
- Steam
- Polishing

Cryogenic Ball Valves

IMI PBM Cryogenic valves have a unique design that provides superior performance through cooling and heating cycles. The valves meet leakage criteria per MSS SP-134. Fire tested to API-607. "CN" series split body ANSI flanged Cryogenic valves are also available.

- Sizes 1/2" - 4" Consult IMI PBM for additional sizes.
- Temperatures from 400°F (205°C) down to -320°F (-200° C)
- **Live-loaded** stem packings
- Fire safe to API 607
- Designed & Tested in accordance with ASME B31.1 and B16.34.
- Materials of construction: stainless steel, other materials available
- Pressures to 720 psi CWP (ANSI CL300)
- Cleaned for oxygen service
- Quarter turn operation
- Locking lever handle or optional oval locking handwheel
- Automation available
- V-Tef™ seats/graphite seals
- Internal and external grounding
- Uni-directional flow and vented ball
- Valve meets or exceeds leakage performance per MSS SP-134
- Optional API-622 Low-e Packing (cannot be lox cleaned)

"CP" Series 2-Way Cryogenic Valves

"CD" Series Diverter Cryogenic Valves

"CN" Series ANSI Cryogenic Valves

Actuator Features

Nominal Values:

Pressure rating of 120 psig (8 barg). Standard temperature range is -4°F (-20°C) to 185°F (85°C). High temperature range is -4°F (-20°C) to 302°F (150°C). Low temperature range is -40°F (-40°C) to 185°F (85°C). Pre-lubricated for life of actuator on assembly. Fully tested on manufacture 100%.

Rotation adjustment 0-90°

From MOD. 52 up to 200

- Standard + or - 5° in both clockwise and counterclockwise direction by means of adjusting screws outside the internal air supply chambers
- Standard visual position indicators

MOD. 270

- Standard + or - 5° in counterclockwise direction by means of adjusting screws in caps
- Kit for + or - 5° in clockwise direction available on request

External connection

- Namur pinion mounting
- Namur solenoid valve mounting
- Bottom of pinion according to ISO 52-DIN 3337
- Optional Beacon Indicator

Operating Pressure

Range - 40 psig (2.8 barg) to 120 psig (8 barg)

Operating Media

Clean, dry air or clean, dry, non-corrosive gas

Stroke

90 degrees standard

Steel pinion

- Nickel-plated for resistance to corrosion
- Stainless steel (optional) for corrosive environments
- Anti-blowout design

Body manufactured from extruded aluminum UNI 6060

- Hard-coat anodized as standard finish 45-50 (micron)
- Good wear resistance
- Bore finished to high standard to ensure low friction and long life

Seals

- NBR standard
- Viton high temperature (optional)
- HNBR low temperature (optional)

Refer to Series "C" IMI PBM Actuator Brochure for dimensions and technical information.

Use IMI PBM's 2-Way Control Valves in industrial and sanitary throttling or shearing applications to accurately control the flow of liquids or thick media. These valves feature characterized balls with various port shapes, including "V."
Manual valve standard.

Control Valves

Sizes:

- 1/2" - 6"

Materials:

- 316 & 316L S/S
- Hastelloy®
- Others

Options:

- Actuation
- 30°, 45°, 60° V Angle (Others Available)
- Slotted
- Locking Handle
- Polishing & Electropolishing
- Automation

Positioners

- Gauges/No gauges
- 4-20 mA (Electro-pneumatic)
- 3-15 psi (pneumatic)
- Weatherproof, explosion proof
- Proximity, Mechanical Switches
- Solid State Sensors
- Flat or Domed Indicator

Electric Actuators

- Weatherproof, explosion proof
- Modulating or On/Off
- 2, 3, or 4 position
- Battery back-up
- Communication Bus interfaces available
- Auxiliary Limit Switches
- Motor Brake
- Handwheel override
- Potentiometers
- AC or DC

Solenoids

Features:

- Compact spool valve with threaded port direct mounts to actuator.
- All exhaust ports are pipeable, providing better protection against harsh environments.
- Standard manual override
- DIN, weatherproof and explosion proof solenoids available
- Single and dual coil solenoid constructions
- Mountable in any position

Position Indicators

Options:

- Weatherproof, Explosion proof
- Mechanical or Proximity Switches
- Fieldbus
- DeviceNet
- Visual Indication
- AS-i
- ATEX, IEC, CSA, NEMA, etc.
